ESM-50-MT9: CPS & Programming Buttons

Items needed:

- ESM-50-MT9
- APX radio compatible with ESM-50-MT9
- Motorola Radio APX Customer Programming (CPS) Software & Radio Management
- USB Programming Cord
- 1. Open CPS software and use the USB cable to connect your APX to the computer.
- 2. Select either **Radio Management or a Recent Codeplug** on home screen depending on what you want to edit.

- a. If selecting **Radio Management**, a new window should pop up.
- b. Select the Radio Codeplug template you want to edit and click Edit Template

4. After checking the External Accessory Enable box, go to **Accessory Buttons** under the **Controls drop-down menu**.

 In the Accessory Buttons screen, the first row (Accy Orange) should be *Emergency* and the third row (Accy 1-dot) will have a drop-down menu to select what function you would like to program the button to execute.

6. To immediately update the radio after selecting the action, go to **Device** in the top ribbon and click **Write Device**.
